Engineering Portfolio: glazaro3251-dev.github.io/Gustabo_Lazaro_Mechanical_Engineer.github.io/

Summary

Mechanical Engineering student graduating in August 2026 with hands-on experience in auto and equipment diagnostics, mechanical, electrical, and hydraulic troubleshooting, and technical problem solving. Experienced in inspecting equipment, analyzing failures, interpreting schematics, and supporting reliable system operation. Seeking an engineering or technical role where I can apply my field experience, mechanical knowledge, and problem-solving skills to support design, testing, analysis, manufacturing, maintenance, or process improvement.

Experience

United Rentals Inc. - Service Technician Level 3 06 / 2011 - Current

- Perform inspections, testing, and technical evaluations on mechanical and electrical equipment to verify condition, safe operation, and serviceability.
- Interpret schematics, manuals, and technical documents to support troubleshooting, repair planning, and technical decision-making.
- Document findings, completed work, parts usage, and recommendations in service records to ensure accuracy and traceability for future reference.
- Gather field and shop condition information to support maintenance planning, equipment readiness, and organized recordkeeping.
- Apply measurement, mechanical reasoning, and technical calculations to enhance troubleshooting, inspection, and repair activities.
- Perform preventive maintenance and corrective work in accordance with manufacturer procedures, safety practices, and operational priorities.

Projects

Northrop Grumman Collaboration Project

UAV Payload Member

- Developed a UAV payload detachment mechanism for a Northrop Grumman collaboration project, applying mechanical design principles to improve payload integration, reliability, and system packaging.
- Contributed to test planning and design evaluation by considering payload release behavior, system reliability, packaging constraints, and vehicle integration requirements to support safe and predictable UAV performance.
- Supported team-based engineering reviews by contributing to design documentation, trade studies, prototype planning, and technical presentations for senior project milestones.

Skills

- Auto / Equipment Diagnostics
- Technical Troubleshooting
- Preventive Maintenance
- Root Cause Analysis
- Technical Assessments
- Wiring Diagrams
- Service documentation
- Client Support
- Microsoft Excel / Word
- Measurements Coursework
- SolidWorks
- Record keeping
- MATLAB experience
- Signal Analysis / Measurements Coursework
- Engineering Controls Coursework
- Perform Auto Repairs, Suspension

Certifications

- EPA 609 Refrigeration License
- Forklift Certification
- Aerial Work Platform Certification

Education

Expected in 08/2026

**California State Polytechnic University
Pomona**

Bachelor of Science: Mechanical Engineering

05/2023

Chaffey Community College
Rancho Cucamonga, CA

Associate of Science: Physics / Math
